Module 3: Designing Your Global STEM Project

Activity Guide

Funded through the generous support of

Before moving to the next module, complete these activities:

1. Complete the Project Definition & Goals/Objectives, Scenario or Problem, and Essential Questions on your Global STEM Project Planning Template.
2. Review examples of project-based lessons with global content and skills. The Asia Society CTE [Toolkit](#) has examples aligned to every career pathway.
3. Identify how SAGE and HQPBL criteria are used in three examples of project-based lessons found online.
4. Explore how global competence aligns with [CTE standards, crosswalks, and rubrics](#) for your CTE area.

When you have completed these activities, you will be ready for "Module 4: Assessing Global STEM Project Base Learning."
