Age of AI: How Educational Leaders are Guiding their Districts

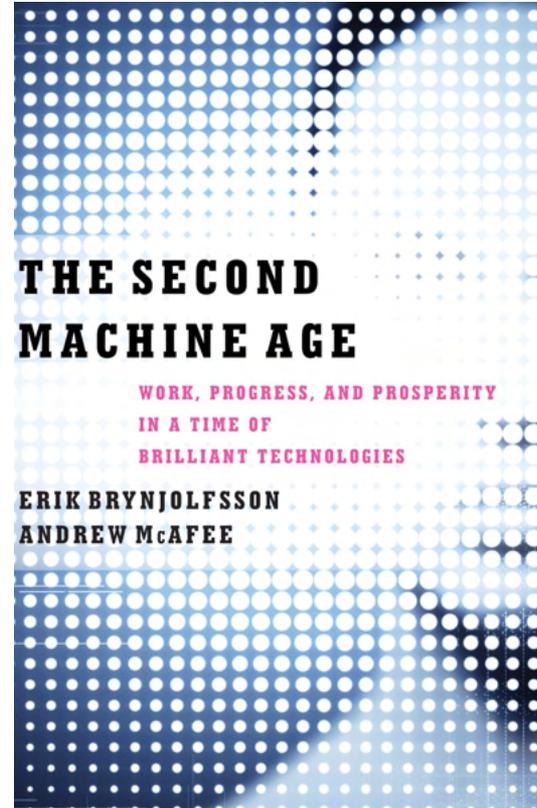

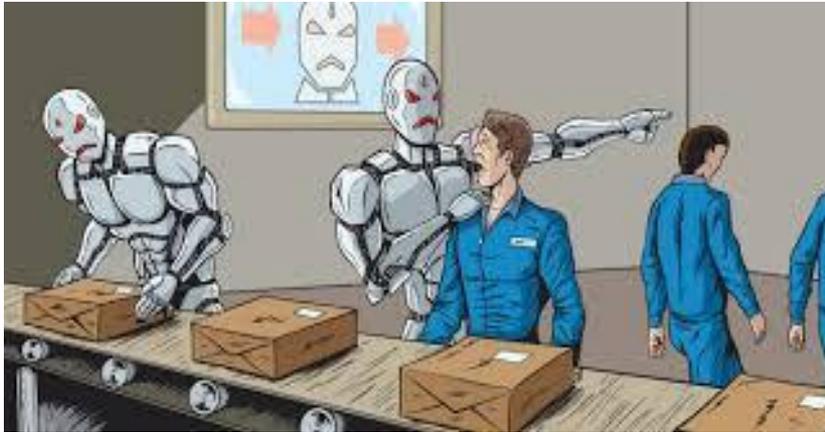

About the Speaker

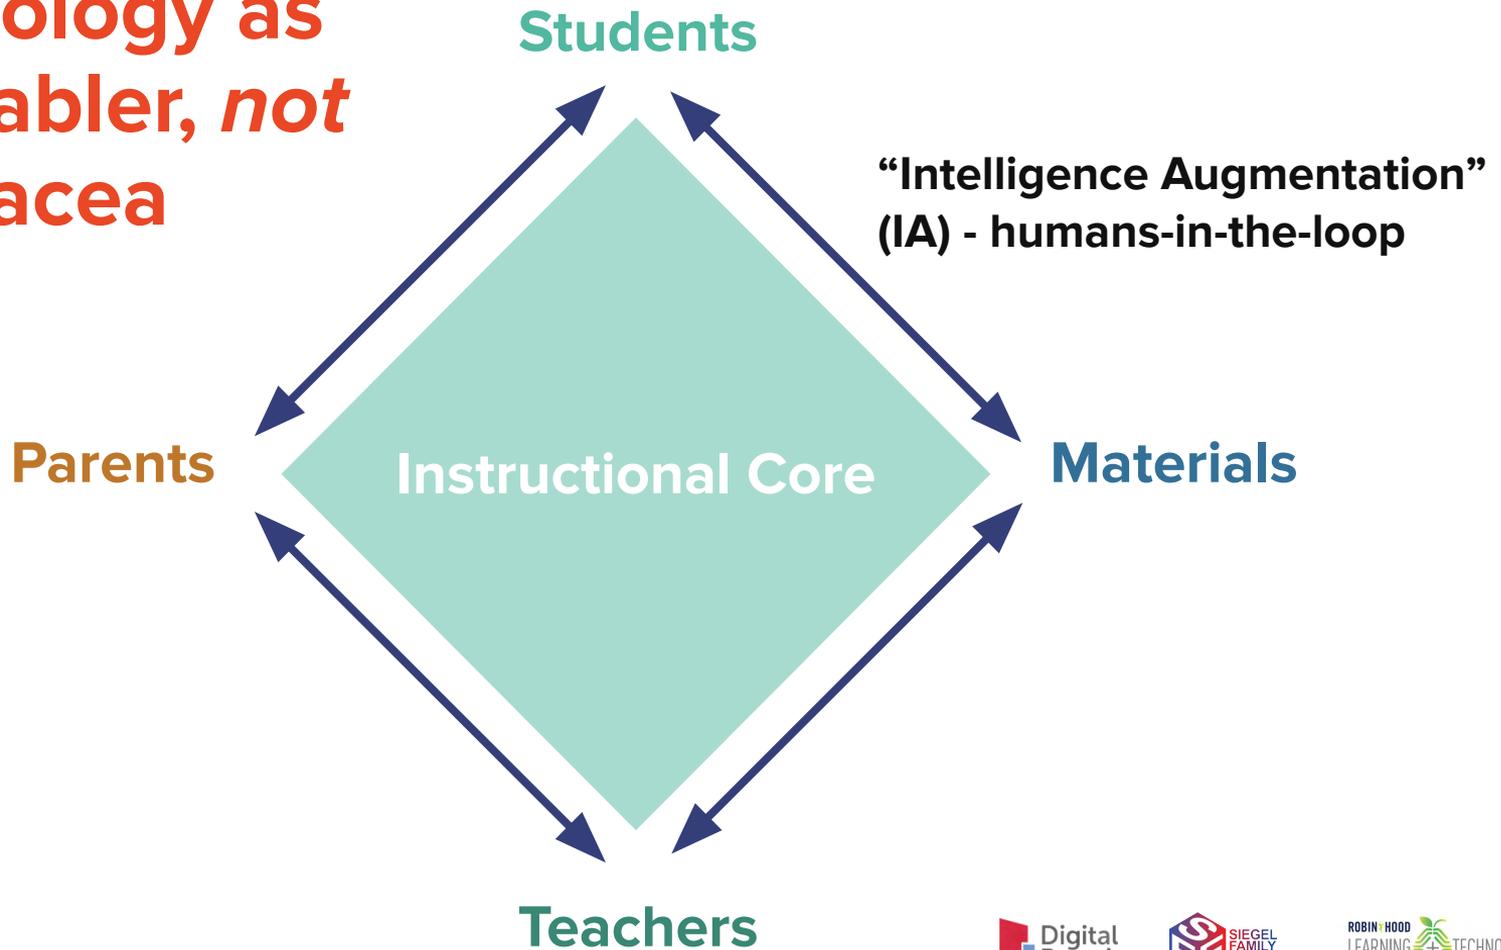

Jean-Claude Brizard

*President and CEO,
Digital Promise*

They are Coming for Our Jobs?

Technology as an Enabler, *not* a Panacea

There are more than 98,000 U.S. schools and more than 9,000 edtech companies.

School districts access an **average of 2,591 distinct edtech tools annually...**

Edtech market
over

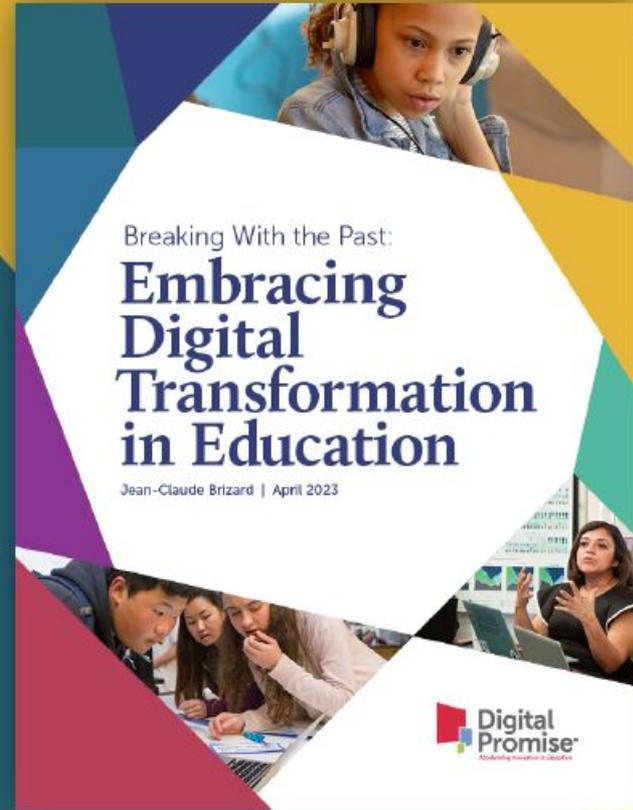

\$89B
per year

International Trade Administration estimates the size of the U.S. edtech market at more than \$89.49 billion (USD) per year, in which the under-13 population is a significant component.

Rising to the Challenge

System Level

Align practitioner and learner need with market incentives for edtech developers

District Level

Limited funding to invest in edtech, challenging to access information to empower procurers at key decision points

Edtech Level

Inadequate support and lack of recognition for companies that build responsibly and equitably

Responsible, Ethical, and Effective Acceptable Use Policies for the Integration of Generative AI in US School Districts and Beyond
